WHO WE ARE...

LITTLE BRIEF

Infini-x TechnoGraphic Lab

Estd. In 2008

We begin our journey in **1998**, with the creative field of graphic designing, Then in **2008** we took our skills and experience to the next level and introduced fully facilitated graphic and 3D model designing lab, as **“Infini-x Technographic Lab”**, Where we facilitate creative & innovative need for almost every Industries,

We used to have In house color proofing and color profiling setups. (from X-rite USA and ColorGATE Germany)

TosscoTech Ind.

Estd. In 20012

After well recognition in creative designing field, we founded **“Tosscotech Industries”**.

At Tosscotech Industries we produce cnc crafted 3D aluminum Matrix, Rubber Molded MS die mould for ceramic and other industries, We do 3D cnc wood crafting, 2D, 2.5D and 3D scanning of any material.

We used to have in house 3axis cnc, vmc, 2D & 3D scanning setups. (We can craft up to 1.2 x 2.4 mtr. and scan up to 2 x 4 mtr. We have biggest scanning facility available in India.)

Estd. In 2019

At **“ProStone”** we emerged through passion to make eco friendly engineered stone products, with an inspirational natural textures and authentic color palettes,

To empower architectures and creators need to add elegance to their projects, and create more meaningful environments and experiences.

Estd. In 2021

After gaining reputed recognition and notable success of ProStone products in Indian architectural and construction market,

We were motivated to research for the possibility and requirement of technically advanced and innovative products for the morden age construction industries,

As a result **“PRO-TECHT”** construction chemicals came in to existence, we are glade to introduce the complete range of technically advanced and innovative products for construction industries.

Estd. In 2022

We have launched **“Ventilo”**, an architectural ventilation blocks, which suits the needs of morden architectural & construction industries.

Ventilo blocks innovatively bridge the living spaces with the nature, to create high aesthetic living spaces and make them breezy and alive.

It especially used in townhouses, villas, farm-houses, gardens, hotels, resorts, coffee shops, decorative walls etc. to make them appealing, naturally breathable and light radiance spaces.

WHAT WE BELIEVE...

**“We do not inherit natural resources,
but we borrow it from the future generations”**

From the stone age, human race has always thrive to mark its footprints and make evolution. The real challenge is to find the balance and harmony between growth & utilization of natural resources.

At ProStone, we understand this and indulge ourselves in defining the modern age spaces by offering state of the art products, and at the same time preserving mother nature for the future generations.

We all can contribute to preserve mother nature with the use of innovativeness, green technology and of course “a strong will” to make it happen. Come, let’s make it happen...together

ProStone promotes hand make & eco friendly products manufacturing.

“ENVIRONMENT FRIENDLY” & “HAND MAKE”

ProStone products are eco friendly and at the same time market oriented, its production and product development process structured in a way that it has minimal effect on environmental degradation, and at the same time it has least use of atomization in production process, as a consequence it creates employment opportunity as well.

This is how we contribute our part in preserving mother nature as well as sustaining life.

WHY PROSTONE...?

Designer's Inspiration

When we witness breathtaking colors and fascinating textures in the nature, we want to capture it all. Each ProStone product is a perfect blend of Nature's creativity & creator's dream to enhance the esthetics of the space.

Timeless Temptation

ProStone products have not been created just to satisfy the need for style and design, but also meet all performance tests and have shown excellent outdoor and indoor durability, making them suitable for any weather & climate conditions, Its appearance and color fastness lasts almost as your architectural project.

Unique Features

ProStone products unlike natural stones, are light weight and has temperature reducing property, which makes it unique and easy to install on height, and are free from algae and fungus, makes it virtually maintenance free.

INSTALLATION GUIDE

Prior to installation of the material, please go through this guide carefully.

PREPARATIONS FOR INSTALLATION

- Do not apply stone upon a painted surface or upon a surface covered with a film of varnish. Correct the situations, depending on the case.
- Do not apply stone upon surfaces with an increased water absorption ratio, upon surfaces that are corroded by humidity, or upon dust – covered or flimsy surfaces.
- During installation in extreme climates, we suggest to use adhesives as per the specifications.
- Do not install the product if it is not in compliance with the specifications. Contact your supplier as soon as possible, producing the relevant purchasing invoices.

INSTALLATION PROCEDURE

- First clean the substrate from dust and dirt, for good accretion of the mortar, Level out the first line of where the stones will be placed.
- If has to work on a substrate like cement board or plywood, Use specially made urethane based adhesive rather than cement based adhesive.
- For prepare mortar, taking into consideration the amount of water, for good accretion and the right consistency.
- Apply mortar on the instillation surface as much as needed, not much thin or not much thick, so that it does not dry out when installing the stone.
- Use hand gloves, if stones are white or bright in color, to prevent dirt or stain on stone.
- Lay out stones and mix from various carto0ns at least 2m² to create a balance between different colors, shapes, thickness and textures.
- When installing the joint the creation of vertical joints in parallel lines must be avoided. Install it in zigzag manner.
- Using the spatula or resembling tool, perimetrically clean the stone from overlapping material for better installation. Since the back surface of the stone is dry, wet it with water to avoid the absorption of water from mortar.
- Fully cover back surface of the Stone with mortar so there is no gap between the stone and the surface.
- Place the stone by pressing hard to ensure a very good adherence of the mortar in the back surface of the stone.
- Use a rubber mallet(rubber hammer) to properly fix and level the stone, in order not to wound the stone.
- Fill the perimetric channel of the stone with mortar by using the spatula. Remove any excess mortar using a trowel.
- Provided that if there is a joint, in order to stabilize the stones spacers can be used where it is needed.
- For grouting between the joint use a pastry bag or a grouting gun. In both cases effectively cut the end until the desirable width for the joint is achieved.
- If mortars gets on the surface of the stone before it hardens (after 0.5 or 1 hour) brush off the mortar with a soft wired brush or hard plastic brush, do not use metal.
- Clean the stones by using a dry paint brush.
- Apply protective / colour enhancer coat to stones.

Thank You

To be Continued.....
